

## **BOM**

### **1. Window Object**

- Create a parent window that opens a child window. The new window should close after 5 seconds.

### **2. Location Object**

Make your own welcoming page of a registration form to display a greeting for the user by his name and title, then show a display of his info (address, gender, email, mobile).

Note: The welcoming page is the page that should be displayed after registration.

The registration form should contain fields for name, email, mobile, address and show “timeout” that fires after 30 seconds if the user hasn’t entered any data

3. Create a new page that has a button (Start clock), that showing alert saying “Clock Started” and displays clock with current time in local format (time only without date) in a div updated every second.

b. Stop the clock when user clicks (alt + w) letter, and show alert saying “Clock stopped”.
