Es6 lab day 3

Promises

a. Make your own interface to create tabs and display usernames by requesting users from the link below using Ajax ES6 fetch function: https://jsonplaceholder.typicode.com/users

Note: handle the response with promises using then and catch methods.

b. When a user tab is clicked display its posts' titles by requesting the posts from the link below using Ajax ES6 fetch function:

https://jsonplaceholder.typicode.com/posts?userId=userId

Note:

- handle the response with promises using Async and await.
- do not get the posts of all users on page load, the user tab must be clicked to request its posts.
